

INTELLIGENT MANAGEMENT OF INTELLECTUAL PROPERTY

Intelligent Management of Intellectual Property

Your intellectual property. Your control.

As the largest and most experienced provider of intellectual property management services in the world, Iron Mountain can safeguard your interests, mitigate your risks, and help you maintain control. We are specialists in two of the most critical areas pertaining to intellectual property: technology escrow and domain name records management. That's why more than ninety-percent of the Fortune 500 trust Iron Mountain for their intellectual property management needs.

A technology escrow agreement is like an insurance policy for your intellectual property. If you are a licensee of technology, we can provide access to the source code of your software should the developer no longer support it for any reason. And if you are a technology developer, we can serve as trusted partner to securely hold your source code to be released only under specific and controlled conditions.

Iron Mountain's domain name records management services reduce the time, risk, and costs associated with managing domain name records and enforcing trademarks online. This is increasingly important as the Internet continues to be one of the major drivers of growth for more and more companies.

Keep a firm hold on your intellectual property.

If software that is essential to the operation or productivity of your business is no longer supported and maintained by its supplier for any reason, your company may suddenly face major risks to its bottom line and reputation.

Iron Mountain created the technology escrow industry in 1982 to help companies protect source code and other intellectual property. By regulating conditional access to this proprietary information, the software can be maintained, while also providing the time needed to research options with a new vendor as necessary. An escrow agreement gives developers added incentive to support and maintain the software on which their licensees' businesses depend. Iron Mountain date- and time-stamps all materials deposited into escrow, creating an audit trail. This provides developers with independent validation of the ownership of the intellectual property.

GET IT DOUBLE-CHECKED.

Verification of deposits goes hand-in-hand with a technology escrow arrangement. Iron Mountain's escrow verification services provide valuable insight into the composition of escrow deposits in easy-to-read reports. These services provide assurance that if there ever is a deposit release, a licensee would be able to quickly read, recreate, and maintain the developer's technology in-house. Without verification, you may not have all of the components necessary to adequately support the application.

MANAGE YOUR ESCROW ON THE WEB.

Iron Mountain's Escrow Management Center portal lets you manage your escrow account quickly and conveniently. By having the ability to view account information, execute transactions, create reports, and access imaged documents in real-time, you can be more responsive to internal and external requests.

Iron Mountain welcomes the opportunity to work with you to define the appropriate level of protection to mitigate the risks associated with your particular situation.

IRON MOUNTAIN'S TECHNOLOGY ESCROW PROCESS

Controlling your domain names. Protecting your trademarks.

Unless watched carefully, domain names can take on an unruly life of their own—especially when you have multiple departments, cost centers, and divisions potentially interacting with over 250 registries worldwide.

This becomes even more important when you consider that up to 35% of domain name records have undetected errors that could lead to business interruption or loss of legal control.

How can you be sure your domain names are consistently managed across the enterprise?

With Iron Mountain's Domain Name Records Management services you can audit, validate, consolidate, register, and protect domain names across your company and around the globe. In fact, Iron Mountain can consolidate, transfer, and manage portfolios ranging from tens to tens of thousands of domain names. These services can significantly reduce the time, expense, and risks of managing your domain name records.

As companies do more business on the Internet, trademarks can be infringed upon or compromised by the unscrupulous. With Iron Mountain's world-class professional enforcement tools, you can track and stop trademark abuse instantly. You'll recapture lost revenues by detecting unauthorized product distributions, affiliations, and logo use.

YOU'RE AT THE CENTER OF CONTROL.

Iron Mountain's Domain Name Center portal gives you secure online access to easily update domain records across companies, subsidiaries, and divisions. And since Iron Mountain manages the entire process, you can focus on your business instead of worrying about intricate domain name management details.

OUR BEST PRACTICE APPROACH TO DOMAIN NAME MANAGEMENT ASSURES CONTROL & SECURITY

Intelligent Management of Intellectual Property

WE GIVE YOU THE WORLD.

Iron Mountain is the world's leading provider of intellectual property management services, with core expertise in technology escrow and domain name records management.

You want to make sure your intellectual property is well managed and available whenever and wherever you need it. As a multi-billion dollar company serving the needs of over 40,000 clients across 145 geographic markets worldwide, Iron Mountain has the infrastructure, resources, and experience to safeguard our clients' interests and help them maintain control. Your intellectual property will be managed by an experienced, qualified team of intellectual property professionals operating under stringent privacy policies to help ensure that your unique needs are met.

Since 1982, Iron Mountain's capabilities have been unparalleled in the intellectual property management industry. We recognize the value of your time and will put our experience to work to handle your needs quickly and efficiently, requiring minimum involvement from you.

In short, whatever your intellectual property management needs, Iron Mountain is clearly the intelligent choice.

- Domain Name Registration
- Domain Name Management
- Domain Name Enforcement

INTELLECTUAL PROPERTY MANAGEMENT SERVICES

TECHNOLOGY ESCROW SERVICE

Protects the interests of both technology developers and the end users who license their products by providing controlled access to source code and other proprietary information under specific conditions and circumstances.

ESCROW VERIFICATION SERVICE

Verifies the contents and functionality of escrow deposits. Provides assurance that, in the event of a deposit release, a licensee would be able to more quickly and effectively recreate and maintain a licensor's technology in-house.

IP LITIGATION DISCOVERY ESCROW SERVICE

Provides a secure and controlled environment for plaintiffs to access and examine proprietary information undergoing litigation, while eliminating potential exposure and risks associated with defendants delivering that proprietary information directly to plaintiffs.

SAASPROTECT ESCROW SERVICE™

Combines escrow protection for Software-as-a-Service source code and applications with a complete backup and recovery solution for the data generated by those SaaS applications.

DOMAIN NAME REGISTRATION SERVICE

Facilitates the acquisition of domain names that support an organization's worldwide business needs, including private registrations that may be required for mergers, acquisitions, or other business objectives.

DOMAIN NAME MANAGEMENT SERVICE

Manages the administration of an organization's entire domain name portfolio, including comprehensive services for modifying, transferring, and renewing domain name registrations.

DOMAIN NAME ENFORCEMENT SERVICE

Audits, monitors, and enforces against unauthorized brand use, including domain names, logos, and trademarks.
